McCarthy Building Companies, Inc. and the Board of Regents of the University System of Georgia invite subcontractors, suppliers, and small businesses to attend a
Meet and Greet Outreach Event

What: Georgia Tech EBB Subcontractor Outreach Session

When: Wednesday, May 29th 9-11AM

Where: Georgia Institute of Technology
Marcus Nanotechnology Building
345 Ferst Street, Room 1117
Atlanta, GA 30332

McCarthy Building Companies and the Board of Regents will host a subcontractor outreach session for the new Georgia Tech Engineered Biosystems Building (EBB). We would like to invite any interested subcontractors to an informal meet and greet to discuss the project and meet the project team.

The project is a new state of the art, over 200,000 SF lab space for Georgia Tech. The facility will be five-stories, with a basement and mechanical penthouse. The Engineered Biosystems Building (EBB) will serve as the focus for Georgia Tech's efforts to improve human health through an enhanced understanding of complex living systems. The building will co-locate and integrate faculty and students from the Colleges of Sciences, Engineering, and Computing whose research focuses on molecules, cells, organisms, and populations as a composite of the dynamically interacting biological systems and pathways that together control the manifestation of disease and determine the state of health.

In order to be placed on the bid list, please prequalify with McCarthy by visiting our website (www.mccarthy.com) and filling out the Subcontractor Prequalification form.
