ISO 9001 Implementation

Decrease the risk for producing defective products

Would you purchase a product that has not been tested and measured against quality standards? If not, then why would you produce one?

By implementing an ISO 9001 Quality Management System (QMS), you are telling current and potential customers that you are ensuring your products will consistently meet their needs. You are also increasing your potential to gain business with larger OEMs that require their supplier base to be ISO 9001 registered.

Manufacturers that attempt ISO 9001 implementation on their own could take up to 18 months to complete the task. Companies working with GaMEP typically take 6-9 months on average.

> **GaMEP will help you:**

- Conduct a gap audit and help you develop an implementation plan.
- Coach your team through QMS implementation.
- Conduct ISO 9001 training throughout the organization.
- Assist with the initial internal audits and management reviews.
- Conduct a pre-assessment audit.
- Help you correct system issues before the registration audit.

> **By utilizing GaMEP's ISO 9001 Implementation service, you will:**

Improve Quality

Reduce Costs

Gain Additional Business

ISO 9001 Implementation in Action

"ISO 9001:2015 is a very relevant management tool and a credential that people are looking for, which made us want to complete certification as quickly as possible. Working with GaMEP expedited the process and helped us stay focused and moving in the right direction."

— Bob Jenkins, owner, Bellwether, Inc.

"The biggest takeaway for us in working with GaMEP to achieve ISO 9001 certification is that we now have processes that deliver better products, on-time and within budget."

— Karen Bolen, quality assurance manager, Georgia Tech Research Institute's Electronic Systems Laboratory

Why Work with GaMEP?

Our goals are simple and impactful:

- Understand the current state of your company.
- Learn about your future goals.
- Teach your team to utilize tools and strategies to meet the needs of your organization.
- Advance your company's competitiveness and ensure a sustainable future for manufacturing in Georgia.

Each of our services resides in one of the following four key strategic solutions pillars within the GaMEP Organizational Excellence framework:

| Business Health | Organizational Alignment | Leadership Development | Forward Thinking |

The Forward Thinking pillar of the Organizational Excellence model helps manufacturers plan for future growth.

ISO 9001 Implementation is one of many services GaMEP provides in this pillar.

The pillars are interconnected to maximize effectiveness. If you have multiple areas to address, request an Organizational Excellence assessment.

What Sets GaMEP Apart

Each year, GaMEP works with more than 1,000 manufacturers to implement on-site projects, conduct training, and connect manufacturers to Georgia Tech resources and our partners throughout the state. We do this through:

- Federal and state funds that help offset the cost to Georgia manufacturers, making your investment more powerful.
- Access to locally based project managers that have years of experience developing and implementing best practices for manufacturers.
- Immediate and long-term solutions that increase top-line growth and reduce bottom-line costs throughout your organization.

Service areas include: process improvement, quality, robotics, business strategy, technology integration, ISO management systems, energy, sustainability, safety integration, and more.

See what all the "Buzz" is about.
