How Companies and Public Sector Agencies Can Do Business With The Federal Government

TAG Government Technology Society is hosting an event geared toward companies and public sector agencies that want to do business with the Federal government.

The U.S. Federal government is the world's largest consumer and they spend in excess of \$60 Billion annually on IT projects alone. In this event, our panel of distinguished professionals include representatives from the General Services Administration (GSA), the buying arm of the Federal government.

Panelists will unlock the secrets to ["How Companies and Public Sector Agencies Can Do Business With The Federal Government"](#) and share their insights with attendees.

The panel will discuss:

- How to grow in the Federal government space
- Pros and cons of working with the Federal government
- The best ways to get started in Federal contracting
- What advantages does GSA offer public sector agencies?

This experienced-based exchange of ideas promises to educate, engage, and provide great insights to companies and agencies that want to expand their horizons.

There is no cost for government employees and you are encouraged to invite your co-workers. [REGISTER TODAY!](#)
